Colombo, Sri Lanka | github | linkedin

Quality Assurance Engineer and ISTQB Certified Tester specializing in test automation, mobile application testing, and continuous quality improvement. Experienced in designing and executing automated and manual testing strategies for Windows, Android, and iOS web and mobile applications, with a strong focus on CI/CD integration. Proficient in Software Development Life Cycle (SDLC), Software Testing Life Cycle (STLC), Agile/Scrum methodologies, defect management, and continuous integration and delivery practices. Passionate about delivering high-quality software through test automation, root cause analysis, effective defect resolution, and continuous process improvement.

WORK EXPERIENCE

Trainee Quality Assurance Engineer - Automation & Manual | IFS R&D International (Pvt) Ltd

June 2025 - September 2026 (1 year 4 months)

- Developed and maintained automated tests for .NET MAUI applications in Windows, Android and iOS platforms using Katalon Studio.
- Performed manual and automated testing including functional, regression, smoke, API testings for web and mobile applications.
- Conducted API testing using Postman and Swagger UI, with Redis for data validation and troubleshooting.
- Integrated Katalon Studio with Jenkins CI/CD pipelines to support continuous and scheduled nightly test execution.
- Managed defects using Jira, including tracking, retesting, verification, and root cause analysis.
- Collaborated in Agile/Scrum teams, contributing to SDLC/STLC activities, test case design, and continuous quality improvement.

TECH SKILLS

TEST AUTOMATION & QA	• Katalon Studio • Cypress • BDD Testing	• Selenium • Swagger UI • Manual Testing	• Playwright • Postman	• Apache JMeter • Appium
PROGRAMMING LANGUAGES	• JavaScript	• Java	• Python	• C#
WEB & MOBILE DEVELOPMENT	• ASP.NET	• .NET MAUI	• React.js	• Node.js
DevOps & CI/CD	• Jenkins	• Kubernetes	• Docker	• Terraform
VERSION CONTROL	• Git	• GitLab	• GitHub	• Sourcetree
OTHER SKILLS	• Jira • Redis • SonarQube	• Linux • MySQL • IntelliJ Idea	• AWS • MongoDB • Visual Studio	• Microsoft Azure • MS SQL Server • Visual Studio Code

EDUCATION

University of Moratuwa - BSc. (Hons) in Information Technology & Management 2022 - 2026

Vishaka Girls' College - G.C.E. Advanced Level 2016 - 2018

- Biology | Chemistry | Physics

G.C.E. Ordinary Level 2015

CERTIFICATIONS

- **ISTQB Certified Tester - Foundation Level (CTFL)**
- Test Automation in DevOps - Test Automation University
- The Whole Team Approach to Continuous Testing - Test Automation University
- TensorFlow for Beginners
- Introduction to Kubernetes

PROJECTS

- **Data-Driven Automated Metagenomic Surveillance Pipeline for Detecting and Quantifying Antimicrobial Resistance (AMR) in Global Wastewater Systems - Research**

  Tech: Python, Pandas, Fastp, Bowtie2, SAMtools, CARD, ResFinder, Shotgun Metagenomics, Bioinformatics, Statistical Analysis

  Developed an automated bioinformatics pipeline to detect and quantify antimicrobial resistance genes (ARGs) from global wastewater shotgun metagenomic sequencing data. Implemented sequence quality control, reference-based alignment, and gene annotation . Designed Standard indicators using Python to integrate resistance abundance, gene and functional diversity, and resistance priority through a normalized geometric aggregation model. Evaluating resistance patterns across wastewater samples to support comparative AMR surveillance and data-driven resistance burden assessment.

  - Project Website

- **CloudMart — Cloud-Native Microservices Platform**

  Tech: AWS , Kubernetes, Docker, Terraform

  Designed and deployed a multi-service e-commerce application on AWS Elastic Kubernetes Service (EKS) as part of a 6-member cloud engineering team. Provisioned and managed a production Kubernetes cluster with auto-scaling, network security policies, pod disruption budgets, and Ingress-based load balancing. Deployed all 5 microservices (Python/Flask, Node.js, React/Nginx) across isolated production and staging namespaces.

  - Project Repo

- **RoamSphere (Individual) - Full Stack Developer & Quality Engineer**

  Tech: React.js, Node.js, Express.js, MySQL, Firebase, Stripe

  Designed and implemented a travel fleet management system tailored for the tourism industry. Leveraged React.js for an interactive front end, Node.js and Express.js for scalable back-end services, MySQL for structured data management, Firebase for real-time features, and Stripe for secure payment processing.

  - Frontend Repo
  - Backend Repo

- **Intern Management System (Team) - Full Stack Developer & Quality Engineer**

  Tech: MERN Stack, Firebase, Jest

  Created a platform to manage interns and mentor interactions, guided by 99X. Developed role-based dynamic and responsive interfaces for main user roles using the MERN stack with Firebase integration and Jest for unit testing.

  - Frontend Repo
